EDUCATION

ALLEN Career Institute
Senior Secondary (PCM)

Gorakhpur, India
Apr. 2026 - Present

PROJECTS

Personal AI Knowledge Assistant | Next.js, TypeScript, Prisma, PostgreSQL,
Clerk, Tailwind CSS, AI

Jul. 2026 - Present

- Building an AI-powered personal knowledge assistant that securely stores and retrieves documents, notes, PDFs, and emails through natural language.
- Implemented Retrieval-Augmented Generation (RAG) with semantic search for context-aware responses from user-owned data.
- Designed scalable PostgreSQL database architecture with Prisma ORM and Clerk authentication for secure document management.
- Focused on privacy, performance, and extensible AI workflows supporting both local and cloud language models.

Intent | Next.js, TypeScript, Tailwind CSS, AI

Jun. 2026 - Present

- Built an AI-powered research platform that aggregates information from multiple trusted sources.
- Designed a unified search experience with intelligent ranking and rich content previews.
- Developed reusable frontend architecture with a strong emphasis on product design.
- Deployed using Vercel with performance and usability in mind.

CodeY | Python, SQLite, Ollama, GitPython, ChromaDB, Watchdog, Typer, Rich

2026

- Building a local-first AI tool that helps developers understand unfamiliar codebases without directly editing their code.
- Indexes project files, code structure, and Git history into local project memory for contextual retrieval.
- Retrieves relevant project context for developer questions and uses a local language model through Ollama to explain the codebase.
- Designed as an offline, free alternative to cloud-based code and project understanding tools.

TECHNICAL SKILLS

Languages:

Python, JavaScript, TypeScript, HTML, CSS

Frameworks & Technologies:

React, Next.js, Firebase, Tailwind CSS, Framer Motion, Ollama, SQLite

Developer Tools:

Git, GitHub, VS Code, Vercel, Figma

Areas of Interest:

Artificial Intelligence, Developer Tools, Full-Stack Development, Software Engineering
